## Additel 95XX Series

### 9506 Additel/PCal

The Additel PCal Pressure Calibration software is used with the 681 pressure gauges, 672 calibrators, and any of the 9XX pumps.

Semi-automated calibration of pressure gauges, transmitters, transducers and other pressure devices can be performed.

Software can be used to manage reference standard instruments and devices under test, as well as generate and customize a calibration certificate.

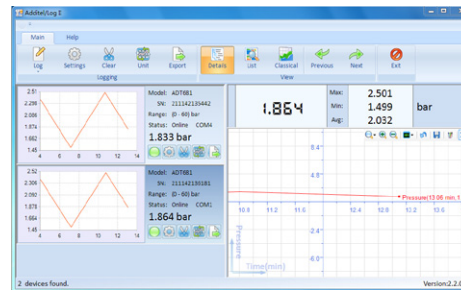

### 9502 Additel/Log II & 9503 Additel/Log II Wireless

**Additel/Log II** is a real-time data logging and graphical software for the 681 series digital pressure gauges and the 672 series digital pressure calibrators.

**Additel/LogII Wireless** is specially designed to be used for real-time data logging and graphing with the 680W wireless pressure gauge.

The software lets you acquire data to your PC. You can choose to display the real-time pressure measurement data in a table or in a graph.

All measurement results can be easily saved into an excel file.

### 9510 Additel/Cal

Task management software for the 22XA series multifunction process calibrators and the 761 series automated pressure calibrators.

Additel/Cal was designed specifically for task management of temperature and pressure calibration.

The main features include establishing a database of all reference and test instruments, maintaining a customer database, creating, uploading and downloading calibration tasks, generating a calibration report, and customizing the calibration certificate.

### 9500 Additel/Land & Additel/Land Wireless

With Additel/Land software, you may download test results stored in the internal memory of Additel calibrators to a PC, and export the results to an excel file. It is a free software package and can be downloaded at [www.additel.com](http://www.additel.com).
